SOFTWARE ENGINEER | PYTHON & DJANGO

PYTHON | DJANGO | LINUX | AZURE CLOUD | MACHINE LEARNING | SHELL SCRIPTING

PROFESSIONAL SUMMARY

Computer Science (Artificial Intelligence) graduate (2026) with hands-on experience in Python, Django, Linux, and Microsoft Azure. Built real-world projects including a Hospital Management System and Azure Cloud Infrastructure using Terraform. Familiar with cloud technologies, shell scripting, and full-stack web development. Seeking an entry-level role in software development or cloud engineering.

EDUCATION

B.Tech – Computer Science (Artificial Intelligence)

GPA: 7.3 | 2022 – 2026

Kakinada Institute of Engineering and Technology, Korangi, Andhra Pradesh

Intermediate (MPC)

85% | 2020 – 2022

Narayana Junior College, Razole, Andhra Pradesh

Secondary Education (10th Grade)

GPA: 10.0 | 2019 – 2020

Sri Chaitanya E.M School, Nagaram, Andhra Pradesh

PROFESSIONAL SKILLS

Programming Languages: Python, Shell Scripting

Operating Systems: Linux Administration, File Permissions, Process Management

Web Technologies: HTML, CSS

Cloud & Platforms: Microsoft Azure – VMs, Storage Accounts, Networking, Resource Groups, Terraform

Tools: GitHub, Visual Studio Code, Figma

Frameworks: Django, Bootstrap

Core Concepts: OOP (Python), CRUD Operations, Django Architecture

EXPERIENCE / INTERNSHIPS

Foundations of Machine Learning – IIIT Hyderabad (iHub-Data)

Machine Learning Intern (Trainee) | Online | Aug 2023 – May 2024

- Learned supervised, unsupervised, and reinforcement learning concepts.
- Completed hands-on assignments applying ML algorithms on real-world datasets.
- Strengthened understanding of data-driven problem-solving approaches.

Fluid Dynamics Virtual Internship – ANSYS

Virtual Intern | Remote | Oct 2024 – Dec 2024

- Worked on computational modeling concepts through guided ANSYS simulations.
- Analyzed system behavior and improved analytical thinking and problem-solving skills.

PROJECTS

MedhaHMS – Hospital Management System | Django, Python, HTML, SQLite

- Developed a web-based hospital management system using Django to handle patient records, doctor details, and appointment scheduling.
- Implemented backend logic and database operations using Django ORM, ensuring efficient data storage and retrieval.
- Built user interfaces with authentication and form handling to enable secure and organized management of hospital data.
- Implemented CRUD operations for managing patient, doctor, and appointment records.

Azure Infrastructure Deployment | Terraform, Microsoft Azure

- Automated provisioning of Azure cloud infrastructure using Terraform (Infrastructure as Code).
- Deployed and configured Virtual Machine, Virtual Network, Subnet, Public IP, and Network Security Group on Azure.
- Set up Azure Storage Account and Blob Container for secure file and data management.
- Configured firewall rules (NSG) allowing SSH and HTTP access; auto-installed Python, Django, and Nginx on VM boot.

CERTIFICATIONS

Salesforce Certified – Agentforce Specialist

Credential ID: 7296064 | Dec 2025
